## PRESS RELEASE

### **Qanteon** Software for energy and building management

Kieback&Peter combines building control technology and energy data management in a single software package. Qanteon is the first building management system with B-AWS certification that also lives up to the ISO 50001 international quality standard and the stipulations of the EU Law on Energy Services and other Energy Efficiency Measures (EDL-G).

Running on many devices independent of operating systems and hardware platforms, an internet browser is all that's required to enjoy Qanteon's full range of features. No additional software installations necessary, and communication takes place exclusively via the encrypted HTTPS protocol.

Qanteon's system-centric presentation displays all aspects of operating status and energy flow at a glance. Computer Aided Facility Management (CAFM) software identifies efficiency potential even for highly complex building operations, while helping to implement and gauge energy saving measures.

The software also effortlessly migrates all data gathered and stored by its predecessor, the SM202 energy management system. Existing data is fully retained and can be instantly accessed, analyzed, and evaluated.

An integrated project planning assistant lets you readily configure key areas consumption, while enabling you to utilize the system to its full potential.

Qanteon's building and energy management software has already won numerous awards for its simple and intuitive design, such as the prestigious German Design Award in 2018.

Qanteon offers a clear overview of the energy and building data.

## About Kieback&Peter

Kieback&Peter GmbH & Co. KG was founded in 1927 in Berlin. With over 1,400 employees and 50 locations worldwide, the family-owned company is one of the leading providers of building automation. Experts integrate building systems such as heating, ventilation, air conditioning and fire protection in one optimized system with the aid of software and hardware. The medium-sized company ensures more comfort, efficiency and security in the building by using simple, smart solutions.

Experienced professionals look after the properties of commercial and public customers throughout their entire lifecycle – on-site, remotely and with centralized services. The engineers and technicians work with great passion on tailor-made automation solutions for their customers. They take just as much care of prestigious buildings like the Berlin Reichstag as they do the school next door. Kieback&Peter's top international customers include Airbus, Daimler and Volkswagen.
